

DietPi SSH access on Windows machine:

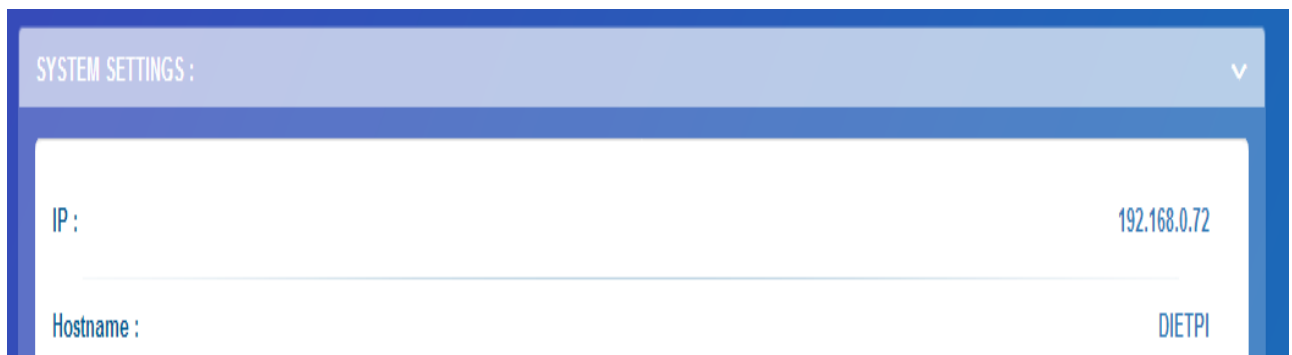

1. download putty.exe or install putty Application on windows

<http://www.putty.org/>

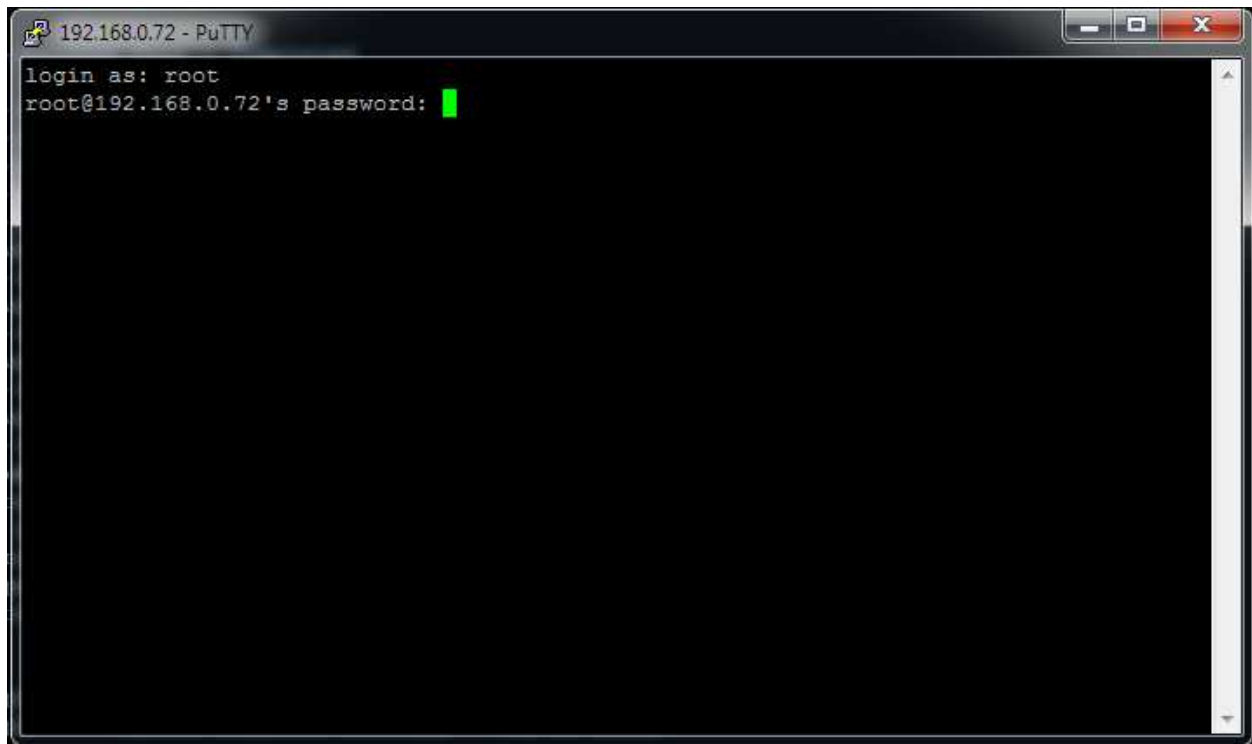

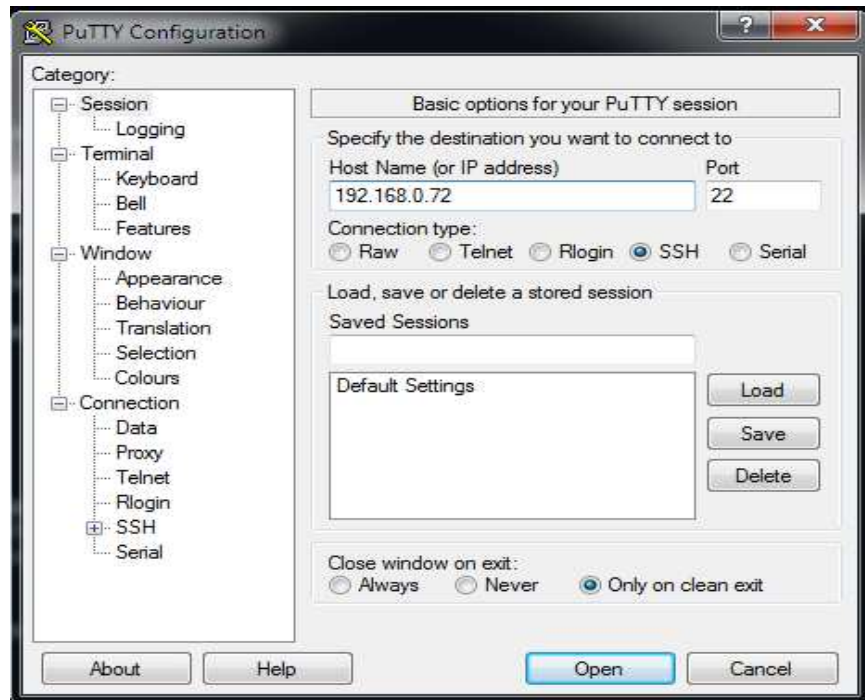

<https://www.chiark.greenend.org.uk/~sgtatham/putty/latest.html>

2. find out the Board IP address :

From GUI : dietpi.local and check under system settings the IP address or from router find out the IPaddress.

3. Open puttye.exe /putty application on windows and login with board IP address. Type the board IP address on putty and open.
(For example shows IP address 192.168.0.72 , you have to enter your board IP address)
